

TOP SEC

Ecological green roofs bringing nature back to cities
through metropolitan circularity and community engagement

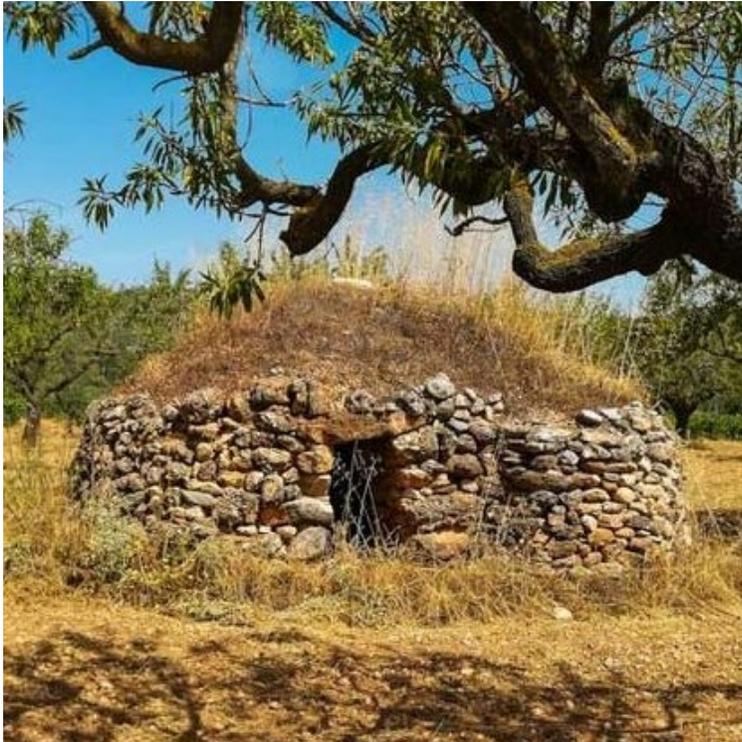

Proyecto de innovación presentado a la 2ª convocatoria EUI-IA

European Urban Initiative – Innovative Actions

Resumen de la propuesta | Julio 2024

Co-funded by
the European Union

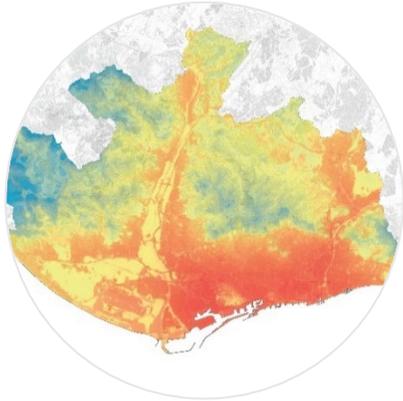

TOP SEC es uno de los 22 proyectos seleccionados, entre 112 propuestas presentadas en toda Europa.

Es un proyecto de innovación que quiere dar respuesta a los desafíos urbanos relacionados con el cambio climático y la generación de residuos y propone la instalación de **cubiertas verdes autosostenibles que no necesitan riego**.

Además, el proyecto investigará técnicas para retener agua y elegir plantas adecuadas, utilizando un **sustrato innovador** hecho con **biochar** elaborado a partir de los **residuos orgánicos** locales.

Retos / Recursos

Olas de calor y periodos de sequía recurrentes

Pérdida de biodiversidad en los núcleos urbanos

Aumento de los residuos orgánicos

Cubiertas planas

Conocimiento técnico

Economía circular

Sociedad civil

Nuevo uso del digestato del contenedor marrón

Revalorización de los residuos orgánicos

Previsión de incremento en la recogida del contenedor marrón

Investigación

Un nuevo uso para el residuo procedente del tratamiento de la materia orgánica: el **digestato**.

Secuestro de carbono

Procedimiento innovador para generar carbón a partir del digestato

Investigación

Máxima retención de agua
Máxima retención de nutrientes
Estabilidad estructural
Efectos filtrantes de la polución
Bajo peso

Nuevo sustrato sostenible

Mezcla con otros materiales para producir un sustrato para cubiertas

Investigación

Nuevo sustrato hecho con materiales de origen reciclado o sostenible y biochar de digestato

Cubierta con máximos beneficios y mínima inversión

Ampliar el uso de las cubiertas

Ya tenemos ejemplos de cubiertas estacionales sin riego

Investigación
Estudiar soluciones constructivas ligeras, económicas y de bajo mantenimiento

Plantas adaptadas

Hay diversas especies que pueden adaptarse a cubiertas sin riego

Investigación
Selección de las especies que mejor se adaptan y estudio de su implantación

Mejoras ecológicas

Biodiversidad

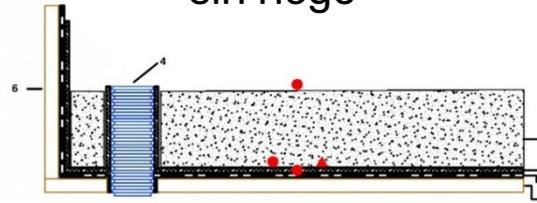

Gestión del agua

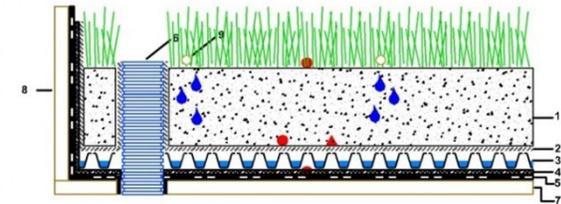

Aislamiento

Pruebas piloto para medir la solución

Conclusiones

1. Los Proyectos europeos son una parte esencial de la proyección internacional de las Instituciones públicas y especialmente un EUI.
2. Debe disponerse de unos requisitos mínimos para trabajar a escala internacional (apoyo político, recursos, tiempo ...)
3. El presupuesto de la UE 2021-27 ofrece muchas oportunidades. Deben analizarse los diferentes programa de la UE con una visión amplia e integral, antes de decidirse por un EUI
4. La competencia es muy grande y deben hacerse Buenos Proyectos.
5. Los Proyectos europeos son una forma para innovar y crecer en las políticas, competencias y servicios.

Metodología de trabajo

The image shows a Miro collaborative workspace interface. At the top left, the Miro logo and the text 'Candidatura - EUI COBERTES' are visible. The workspace contains a large, complex mind map with various nodes, text boxes, and diagrams. A prominent text box in the center reads 'CALL CLOSES OCTOBER 5TH AT 2 PM'. The mind map includes several numbered callouts (2, 4, 5, 7, 8, 9, 16) and circular icons with letters (M, G, V). A 'Frame 2' label is positioned above a diagram in the upper center. The interface includes a toolbar on the left with icons for navigation and editing, and a top toolbar with icons for zooming, copying, and sharing. The bottom right corner shows zoom controls set to 1% and a 'Compartir' (Share) button.
