From top-down approach to dialogue driven

1. ..Cities are urged to set ambitious ecological goals for climate and biodiversity while managing social and economic sustainability..

2. ..No European city has yet achieved the SDGs although they are a great fit for cities to develop their action and governance..

3. ..The urgency of action is understood on theoretical level, but it does not resonate with operational level realities and everyday work of cities..

Strategic Urban Governance

Cities for sustainability governance | URBACT | Co-funded by the European Union Interreg

Achieving the SDGs through systematic and strategic urban governance

VLR
(Voluntary Local Review)

"Where are we now?"

**Future foresight co-created through SDG-canvas**

"Where do we need to be?"

Outcome: Holistic Municipal Strategy

"How to get there?"

SUSTAINABLE DEVELOPMENT GOALS

Vygotski ja oppimisen reunaehdot

Kaupunkiverkostotyön 3 tasoa

1. Oppien ja ideoiden jakamista: verstaisoppimista ja -tukea – **TASO 1**

2. Samalla uusien paikallisten, kansallisten ja KV-ideoiden ja projektien hahmottamista – **TASO 2**

3. Oman yhteisön sitouttamista glokaaliin tekemiseen – **TASO 3**

"In networks with right kind of facilitation, emotional sharing and commitment you understand that your approach, your ideas and your actions are relevant to others only when you are able to design, implement and communicate them in a way that is engaging. At a logical and at an emotional level."

Opit kaupunkiverkostotyöstä

- Uuden kokeilua ja luovuutta

- Vihdoin saa mennä kovaa ja tehdä virheitä – sitä oikein odotetaan!

- Resurssi – rahallinen mutta myös osaamista ja kumppanuutta

- Ei saa pelätä työn määrää – hallinto ja raportointi kuuluu asiaan

- Määrittele toimenpiteet tarkkaan sillä palvelet useampaa tahoa

- Älä vaan ajattele että kuntani ei ole tarpeeksi sitä tai tätä – rohkeasti toimeen!

The rules of innovation and transformational - collaboration for Cities

Working in a CSG	The Hierarchical model
Break rules and dream	Excel at your job
Open doors and listen	Be loyal to your team
Trust and be trusted	Work with those you can depend on
Seek fairness, not advantage	Seek a competitive edge
Experiment and iterate together	Do the job right the first time
Err, fail and persist	Strive for perfection
Pay it forward	Return favours
